SKILLS

React, NextJs, Tailwind

NodeJs, ExpressJs, TypeScript

SQL, PostgreSQL, MongoDB

Docker, Kubernetes, Firebase

Git, Swagger, PHP, MySQL

LANGUAGES

Spanish - Native

English - B2   Certificate

EDUCATION

Course
09/2023 - present
Currently I'm learning C#, .NET core/framework.

Course
Udemy   Certificate
06/2023 - 08/2023
Microservices backend architecture with NodeJS.

Non-regulated training
Plataforma 5
09/2022 - 12/2022
800 hours of technical training with activities focused on pair programming and teamwork using SCRUM as an agile methodology.

Undergraduate degree
FICH - UNL
03/2021 - 10/2021
Engineering Informatics.

PROFILE

Passionate about technology from an early age, I started my path in the world of computer science with a degree in Computer Engineering. My interest was focused on web programming. After a demanding bootcamp at 'Platform 5', I acquired soft skills with agile methodologies and the ability to learn quickly. Now, I seek challenges to expand my skills and contribute to the success of projects. My commitment to excellence is seen in my constant learning and application of my knowledge in web solutions. I'm looking for opportunities to innovate and continue learning in this exciting industry.

WORK EXPERIENCE

FullStack Developer   View code

AIDAM   04/2023 - 06/2023

- Freelance project where an application (PWA) was developed to manage reports and observations on patients of the specialized center for hearing impaired AIDAM.
- For the frontend, NextJs together with TypeScript was used as the base framework and Tailwind for the styles.
- For the backend we used NodeJs together with TypeScript, ExpressJs as API framework and MongoDB together with Mongoose for the database.
- Deployment was performed using a linux-based VPS.
- The project was carried out as a team through the agile SCRUM methodology, integrated by 2 developers, with a duration of 60 days.

FrontEnd Developer   View deploy

AIDAM   03/2023 - 03/2023

- Freelance project where a complete descriptive web page about the specialized center for hearing impaired AIDAM was developed.
- NextJs and Tailwind were used for the development.
- Deployment was performed using a linux-based VPS.
- The project was carried out as a team through the agile SCRUM methodology, integrated by 2 developers, with a duration of 10 days.

Tonic-3   10/2022 - 11/2022

- Professional internship type project for the company Tonic-3 in conjunction with Plataforma 5 where an application (PWA) was developed on a soccer PRODE, set in the Qatar 2022 World Cup.
- It has a prediction system with points and a ranking with prizes, push and email notifications; administrator panel with metrics, creation of tournaments, teams and matches; geolocalized restriction to certain countries.
- The project was carried out as a team through the agile SCRUM methodology, integrated by 5 developers, with a duration of 40 days.
